

High cost(non-preferred) Generic Drug List

GlobalHealth, in partnership with MagellanRx, continually monitors generic medications to offer the best overall health care value at the lowest possible tier. A Generic Drug is equivalent to its brand name counterpart. While generic medications are usually less expensive than brand name medications, certain generics are not always the lowest cost option. There are times where a generic alternative can be more expensive than other generic medications within the same therapeutic class. We have identified options for members to reduce out-of-pocket costs, while offering the same clinical benefit.

The following is the 2019 list of High Cost Generics. For additional questions on lower cost options please consult your primary care physician or contact Magellan at 1-800-424-1789.

Please Note: High Cost Generics will process at Tier 3 copays.
